<b>Office Action Summary</b>	<b>Application No.</b> 10/580,732	<b>Applicant(s)</b> CAMPBELL ET AL.	
	<b>Examiner</b> Melvin A. Cartagena	<b>Art Unit</b> 3754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 3 is objected to because of the following informalities: There is a typographical error in line 4, the word “and” needs to be spaced from the numeral “12”.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3,233,779 to Cornelius.

Cornelius shows a method of filling a food product into a compartment 16 of a container 10, where the container has another compartment 17 filled with a propellant at a pressure of 7.4 Bars, see column 5, lines 12-15. The two compartments are separated by a moveable wall 12.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 3,233,779 to Cornelius in view of US 2003/0134024 A1 to Malone et al.

Art Unit: 3754

Cornelius shows all claimed features as discussed above except for using the dispenser to dispense an ice cream product containing a freezing point depressant with a molecular weight less than or equal to  $-8 \text{ Fat} + 330$ , mixed with an ice cream product. Malone shows an ice cream product containing a freezing point depressant in the range of 25-37% and between 2-12% fat by weight that satisfies the above equation, see column 2, lines 51-58 and column 3, lines 9-11. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to dispense the ice cream product of Malone in the device of Cornelius to prevent the propellant from coming in contact with the product and alter the desired characteristics of the ice cream product.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ghaffari shows a frozen confection utilizing a freezing point depressant. Feygin shows a fluid handling system.
